

SIKA AT WORK

COTTON EXCHANGE, LIVERPOOL

ROOFING: : Sika 618, Sika Reemat Premium

COTTON EXCHANGE, LIVERPOOL

PROJECT REQUIREMENTS

In the heart of Liverpool's commercial district, the Cotton Exchange is a stunning Grade II listed office building and one of the city's most historic office buildings.

Registered Sika Liquid Plastics contractor and national concrete repairer, Grade 2 Structural Repairs Ltd, based in the North West, were specified for the job after the company applied to go on a Liquid Plastics contractor scheme. As part of the process, Grade 2 put three projects forward with The Cotton Exchange being one of them.

SIKA LIQUID PLASTICS SOLUTION

Forming part of a multimillion pound refurbishment, Grade 2 were briefed to carry out isolated concrete repairs to wall areas along with restorations to all the decoration works to the exterior of the property. The Cotton Exchange also required a Sika Liquid Plastics product that was watertight, ensured longevity and was aesthetically pleasing to the human eye; this led to the specification of the Sikalastic 618.

The building is designated by English Heritage as a Grade II listed building, so there was a very stringent processes in place in relation to the installation and finish of the roofing system. The building itself was a very unusual shape, and was very close in nature to the shape of historical air-raid shelters. This meant that Sikalastic 618 was a fantastic solution to deal with the curved nature of the roof, due its flexibility when being applied to uncommon shapes and details.

Utilising high-performance materials, outstanding workmanship, the refurbished roof was completed on time, on budget, to meet all of the client's demands.

PROJECT PARTICIPANTS

Contractor: Grade 2

Roofing Client: Bruntwood

Size: N/A

Our most current General Sales Conditions shall apply.
