AUTOMOTIVE GLASS REPLACEMENT
FOCUS ON PERFORMANCE
Sika is a Tier 1 supplier and development partner to the global automotive industry. Together with our customers, we help create the automobiles of tomorrow. Sika aftermarket solutions have been driving the automotive industry worldwide for more than 30 years. Our intelligent products combine state-of-the-art technology with user-oriented application properties which make it easy to get started right away.

THE LEADING BRAND FOR WINDSCREEN ADHESIVES
Based on our competencies as a leading OEM supplier we provide a comprehensive portfolio for sealing and bonding, noise damping and protective coating applications in car body repair. Innovation, performance, reliability and ease of use make Sika products the number one choice of automotive glass and body shop professionals all around the world.

TRUST A POWERFUL GROUP
Sika is a Swiss-based specialty chemicals company with more than 100 years of experience. For Sika, innovation has always been the driving force in its quest to become the global leader. It all started more than 25 years ago, when we started supplying BMW with the Black-Primerless adhesive system. Over the years, we went on to develop relationships with almost all vehicle manufacturers globally.

In 2014, Sika was applying for more than 70 patents. Our products are used in 50% of all vehicles produced. Sika is a global player, but highly focused on having people in the market who speak the local language and who know about your business; we currently cover 93 countries.

At the time of writing, more than
300 MILLION
windscreens have been replaced using Sika adhesives

Over
30 MILLION
headlights, sunroofs and spoilers are bonded with Sika adhesives annually

1 OUT OF 3
windscreens worldwide is replaced using Sika adhesive

50 %
of vehicles produced world-wide use Sika technology

Local Sika presence in over
93 countries

Sika technology saves
80 MILLION
liters of fuel annually (240 million kg of CO₂)

Sika supplies more than
400 MILLION
acoustic damping parts per year
The windscreen is an integral part of a vehicle’s safety system. Its role is to stay in place and keep occupants inside the vehicle in case of an accident. It not only serves as the backboard for the inflating passenger airbag; today’s vehicles are also stiffened by the bonded windscreen. It is vital that the windscreen stays attached to the car body even in a rollover accident. If a windscreen is not installed properly, it can come loose in a collision and separate from the car body flange, causing serious injuries. Reliable and easy to use adhesive systems from Sika make the difference and ensure the highest safety standards for every one of your installations.
We are focused on the three core values that have made us number one in the global markets: **INNOVATION, SIMPLICITY AND SAFETY**. Our aim is to simplify the professional application process with reliable and fast curing adhesive systems and short safe drive-away times that maximize the safety of vehicle owners and passengers.

Making visions come true  
**INNOVATION**  
Sika adhesive solutions continue to lead as best-in-class. We do more than just respond to the needs of our professional customers; we also take future requirements of the automotive industry into account. This enables us to launch powerful innovations while focusing on you and your customers’ needs.

From professionals, for professionals  
**SIMPLICITY**  
Your daily work inspires our development efforts. That’s why we closely collaborate with automotive glass technicians and vehicle body experts in order to find intelligent solutions that meet your requirements perfectly, making Sika products easy to use, straight out of the box.

Always more than required  
**SAFETY**  
We are serious about taking no shortcuts when it comes to protecting vehicle drivers and passengers. Sika applies the highest safety standards and outperforms international requirements.

**MORE THAN 60 CRASH TESTS**  
**NO SHORTCUTS TO SAFETY**  
**FROM TECHNICIANS, FOR TECHNICIANS**  
**EASY HANDLING**  
**SAVE TIME. INCREASE PRODUCTIVITY**
SAFETY WITHOUT COMPROMISE
Advanced Sika SDAT Standard

Sika is the one and only adhesive manufacturer worldwide using a 95th percentile crash test dummy. Due to the use of a heavier dummy, our tests can cover a higher percentage of people worldwide. **WITH SIKA, YOU ARE ON THE HIGH ROAD TO SAFETY.**

Sika is the pioneer in Safe Drive-Away Time (SDAT): we continuously monitor market developments, simulating and modeling our solutions in order to provide the safest conditions for vehicle drivers and occupants in every situation. Meeting the requirements of national and international law is not enough for Sika. We always want to go one step further. We always test our Sika Safe Drive-Away Time under more severe conditions than the FMVSS 212 standard requires. This makes your automotive glass business, and your customer’s life, a bit safer than safe.

**OUTPERFORMING REQUIREMENTS**
Optimizing is our business, not only with regard to our total competence but also in terms of our testing standards. The 1976 FMVSS 212 standard utilizes a 50th percentile dummy, which is designed to represent about half of the adult male population. When Sika introduced our first crash standards, the US and some other countries did not have laws requiring vehicle passengers to wear seat belts. These days use of seat belts is enforced by law.

At Sika we decided to improve our testing standard and started to utilize a taller and heavier 95th percentile dummy, covering significantly more people and therefore more of your potential customers. In addition, we started to belt our crash test dummies. The combination of the 95th percentile dummy with seat belts is as critical as our old standard but comes much closer to reality.

PowerCure is the latest technology for accelerated curing adhesives. For the first time here, Sika is taking a total solution approach. We believe reaching the next level of technology is only possible if the system reflects the reality an automotive glass technician has to deal with every day. PowerCure has been developed together with automotive glass technicians from the very beginning; it is designed for both mobile and shop environments and has proven its reliability under the harshest conditions.

PowerCure adhesives reach a new level of performance at an unmatched level of comfort. For the first time here, we have developed a total solution for vehicle glass replacement, and this has allowed us to question each little step, from mounting a unipack to the actual extrusion of the adhesive. The PowerCure system is probably the first ever to be developed together with automotive glass professionals from the very beginning.

- Simple as a one-component
- Minimized waste, maximized yield of adhesive
- Ergonomic design
- Fastest unit replacement on the market
- Long working time but quick curing
CURED TO OEM LEVEL
SikaTack® ELITE allows a car to be lifted by its windscreen in as little as 60 minutes. This is what we understand practically by adhesives which are cured to OEM level.
Having just a short Safe Drive-Away Time (SDAT) is not the definition of a safe system! Vehicle manufacturers apply stricter standards for releasing a vehicle back into operation than the average automotive glass shop. Up until now, no system has been able to reach car manufacturers’ (OEM) performance requirements quickly enough and easily enough to be used by independent automotive glass companies.

**PowerCure ADHESIVES ARE DIFFERENT!**

**CURED TO OEM LEVEL**

PowerCure adhesives cure independently of the climate from the inside of the bead. They cure within minutes to the strength level specified by vehicle manufacturers. PowerCure adhesives reinforce the car’s body structure to the original level within just 60 minutes, whereas one-component products can require up to several weeks depending on the climate. Rapid deployment of structural integrity is one of the key reasons why some vehicle manufacturers require their service centers to use accelerated or two-component adhesives. There are further benefits to using PowerCure adhesives too:

- comebacks can be repaired quickly without risk of soiling car interiors
- sensors can be calibrated quickly and without any concerns
- insurance and subcontracted work will meet all OEM standards

and you could even lift a vehicle by the windscreen just 60 minutes after installation.

THE HIGHEST PRECISION IN YOUR HANDS

The PowerCure adhesive system delivers the precision and performance of high-end pump systems found at vehicle manufacturer’s production lines. It combines high flexibility, ergonomic and easy handling, and minimizes waste in a clear and focused design. The use of a single, brushless motor mechanically couples extrusion, dosing and dynamic mixing, and allows controlling of extrusion speed on the go without compromise. Providing the fastest curing adhesives at unmatched comfort level, PowerCure is the total solution for smaller sealing and bonding applications.

PACKAGING

Based on the unipack: PowerCure packaging is based on the unipack, the most efficient packaging solution for windshield adhesives. The packaging is designed to minimize wastage and to allow very simple mounting and replacement.

MIXER

Dynamic & efficient: The mixer is designed to fit an ordinary application nozzle. The specially shaped v-cut supports the application of the adhesive at a convenient angle to the glass and cuts material consumption by up to 8 %.
The PowerCure Dispenser

**Single motor design:** The PowerCure Dispenser matches the precision of pump and dosing systems found on vehicle manufacturers’ production lines. The use of a single, brush-less motor mechanically couples extrusion, dosing and dynamic mixing. This allows users to control extrusion speed on the go without compromise.

«FROM THE VERY BEGINNING WE ANALYZED WORKING AND HANDLING PROCEDURES OF APPLICATORS IN THE FIELD. EVERY LITTLE STEP WAS QUESTIONED AND CONSTANTLY CHALLENGED. WE AIMED TO MAKE USING PowerCure AS SIMPLE AS USING A SINGLE COMPONENT PRODUCT. IN MANY ASPECTS IT’S EVEN SIMPLER AND FASTER.»

David Tobler, Head Automotive Aftermarket
AUTOMOTIVE GLASS PRODUCT RANGE

From Sika cleaning products to premium adhesives, we ensure an efficient process right from the beginning. Automotive glass professionals benefit from an excellent workflow with well-matched products.

SikaTack® ELITE
High-speed Performance in Every Climate

SikaTack® ELITE is an advanced windscreen adhesive, specifically developed and engineered for our innovative PowerCure system technology. The quick curing of SikaTack® ELITE enables you to meet OEM requirements in less than 60 minutes! The Safe Drive-Away Time is already reached just 30 minutes after installation. Boost your business with a potentially record-breaking performance.

THATCHAM APPROVAL
SikaTack® ELITE is a Thatcham-approved repair product.

YOUR BENEFITS
- True 30 min Safe Drive-Away Time, tested under the new 95th percentile FMVSS 212 standard
- Cures to OEM level within 60 min
- Meets all OEM requirements, including Volvo, VW, Audi, etc.
- Fast curing
- Curing independent of climate conditions
- Very short cut-off string
- Compatible with all car makes due to Sika’s all-in-one modulus

SikaTack® ELITE requires the PowerCure Dispenser as well as the PowerCure Mixer Nozzle. For pre-treatment, SikaTack® ELITE requires the Sika All-Black bonding process.

AVAILABLE ITEMS
- Box with 14 × 600 ml PowerCure Pack Item No. 496374

PowerCure System

The PowerCure adhesive system delivers the precision and performance of high-end pump systems found in vehicle manufacturers’ production lines. It combines high levels of flexibility, and ergonomic and easy handling, and minimizes waste in a clear and focused design.

Further Information and Video Tutorials
SikaTack® PRO
Premium Choice for Automotive Glass Professionals

Our innovative windscreen adhesive has been tested under the most severe conditions. With our all-in-one technology, SikaTack® PRO is a perfect fit for all car makes and models, and delivers high value for money.

YOUR BENEFITS
- True 30 min Safe Drive-Away Time, tested under the new 95th percentile FMVSS 212 standard
- Safe Drive-Away Time valid for all climates, ranging from -10 to 35°C
- Very short cut-off string
- Compatible with all car makes due to Sika’s all-in-one modulus
- Compatible with Sika’s Black-Primerless and All-Black bonding process

AVAILABLE ITEMS
- Box with 12 × 300 ml cartridge, black Item No. 496038
- Box with 12 × 400 ml unipack, black Item No. 496039
- Box with 20 × 600 ml unipack, black Item No. 496037

SikaTack® DRIVE
The Application Champion

SikaTack® DRIVE is a windscreen adhesive with superior application properties: it is the application champion on the market. SikaTack® DRIVE offers a true 60 min Safe Drive-Away Time for climates ranging from 5°C to 35°C. With Sika’s all-in-one modulus technology, it is a great choice for all car makes and models.

YOUR BENEFITS
- True 60 min Safe Drive-Away Time
- Short cut-off string
- Compatible with all car makes due to Sika’s all-in-one modulus technology
- Compatible with Sika’s Black-Primerless and All-Black bonding process

AVAILABLE ITEMS
- Box with 12 × 300 ml cartridge, black Item No. 401648
- Box with 12 × 400 ml unipack, black Item No. 97234
- Box with 20 × 600 ml unipack, black Item No. 97233

SikaTack® MOVE Transportation
All-in-one Solution for Bus and Coach Glass Replacement

SikaTack® MOVE Transportation is a windscreen adhesive with excellent weathering stability. It is ideally suited for the replacement of bus and coach glass where it can be used for bonding as well as sealing application. SikaTack® MOVE Transportation offers a 2-hour Safe Drive-Away Time for supported windscreens.

YOUR BENEFITS
- 2-hour Safe Drive-Away Time for supported bus and coach glass*
- Excellent weathering stability; useful for exterior joint sealing
- Compatible with Sika’s Black-Primerless and All-Black bonding process

AVAILABLE ITEMS
- Box with 20 × 600 ml unipack, black Item No. 89696

*special advice on Safe Drive-Away Time for heavy bus and coach glass is available upon request.
**SikaFast®-223**
*Weathering-resistant Joint Sealant*

SikaFast®-223 is a multi-purpose joint sealant with excellent adhesion on aluminium, GRP, stainless steel, 2-c coatings and organic glass (polycarbonate and PMMA). Due to its excellent weathering resistance, it is well suited for open joints. In the automotive aftermarket, it can be used for the bonding of plastic windscreens when the bond line is protected from UV light.

**YOUR BENEFITS**
- Excellent weathering stability; useful for sealing exterior joints
- Repair solution for plastic windscreens (bond line needs UV protection)*
- Compatible with Sika’s Black-Primerless and All-Black bonding process

**AVAILABLE ITEMS**
- Box with 12 × 300 ml cartridge, black Item No. 525849
- Box with 20 × 600 ml unipack, black Item No. 514643
- Box with 12 × 300 ml cartridge, white Item No. 525948
- Box with 20 × 600 ml unipack, white Item No. 514644

* protection of bond line by a black frit or external protection, e.g. with Sika® UV Shielding Tape.

---

**SikaFast®-1640**
*Rear Mirror Bonding Kit*

SikaFast®-1640 is designed for bonding rear mirror brackets to vehicle windscreens. It is suitable for bonding glass, ceramics and metals as well as a combination of these materials. The rear mirror can be installed just minutes after the bracket has been bonded.

**YOUR BENEFITS**
- Ideal for bonding rear mirror brackets to windscreens
- Very fast curing to handling strength
- Easy to use
- 100 % reactive substance, no solvents

**AVAILABLE ITEMS**
- Box with 25 × 50 g + 10 ml kit, light yellow Item No. 517865

---

**SikaFast®-5211NT**

SikaFast®-5211 NT is a fast curing, flexible structural adhesive designed to replace mechanical fixings such as rivets, screws or welding. It is suitable for high strength fastening of concealed joints and exhibits excellent adhesion on different types of substrates including top coats, plastics, glass, wood, etc. Suitable for bonding of complex rear mirror brackets.

**YOUR BENEFITS**
- Adhesion to a wide range of substrates
- Low odor
- Fast strength development

**AVAILABLE ITEMS**
- Box with 12 × 10 ml syringe, grey Item No. 466659
- Box with 12 × 250 ml, grey Item No. 413411
AUTOMOTIVE GLASS CLEANING AND PRE-TREATMENT

**Sika® Cleaner PCA**
Contamination Remover

A smart cleaning foam usually used in combination with Sika® Cleaner G+P, designed specifically for removing contamination that cannot be sufficiently removed with standard cleaners or without scratching the surface. See the effect before the treatment is even finished!

We recommend using Sika® Cleaner PCA as part of the windshield pre-treatment process. It can be used in combination with the Black-Primerless and All-Black bonding process.

**YOUR BENEFITS**
- Easy to use
- Highly reliable
- Multipurpose product
- Removes many kinds of contamination such as green snake contamination, fingerprints, tape residues, etc.
- Can be used for primer application

**AVAILABLE ITEMS**
- Box with 168 pads, light grey  Item No. 492763
- Box with 48 pads, light grey  Item No. 529100

---

**Sika® Cleaner G+P**
High-quality Glass and Plastic Cleaner

This alcohol-based solution for cleaning glass and non-porous surfaces is used to clean windscreen and remove finger marks and residues. It leaves no residue on the surface, thus ensuring easy use and there is no need to re-polish the windscreen.

**YOUR BENEFITS**
- Streak-free drying
- Quick drying
- Non-freezing winter version available

**AVAILABLE ITEMS**
- Box with 12 × 500 ml trigger spray, light blue  Item No. 527420
- Box with 25 l bottle, light blue  Item No. 527421
- Box with 4 × 5 l concentrate 1:4, light blue  Item No. 527422

---

**Sika® Aktivator PRO**
The all-season Glass Activator for Black-Primerless Bonding

This unique pre-treatment agent is specially designed to provide adhesion on automotive glass replacement substrates. Thanks to the single wipe application, Sika® Aktivator PRO simplifies the work activities, increases performance and boosts quality.

**YOUR BENEFITS**
- Single wipe application
- 3 min flash-off time
- All-season technology

**AVAILABLE ITEMS**
- Box with 24 × 30 ml can, colorless  Item No. 161886
- Box with 8 × 100 ml can, colorless  Item No. 161887
- Box with 6 × 250 ml can, colorless  Item No. 154884
- Box with 4 × 1000 ml can, colorless  Item No. 154885
**Sika® Primer-207**

The All-Black Pre-treatment Solution for Automotive Glass Replacement

This multipurpose glass and paint primer is specially designed for automotive glass replacement. Sika® Primer-207 offers excellent adhesion performance as a one-step primer for float glass and ceramic-coated glass as well as OEM and aftermarket paints, PVC, PMMA, ABS and a number of other plastic materials. It is also useful as a corrosion protection primer for the AGR business.

Sika® Primer-207 is used as part of the Black-Primerless and All-Black bonding process for automotive glass replacement.

**YOUR BENEFITS**
- Quick drying: only takes 3 min, all year round
- One product: simplifies work procedures and inventories
- One solution for all typical AGR substrates

**AVAILABLE ITEMS**
- Box with 24 × 30 ml can, black  Item No. 417300
- Box with 8 × 100 ml can, black  Item No. 417301
- Box with 6 × 250 ml can, black  Item No. 417302

---

**Sika® Remover-208**

Cleaning Agent for Surface Preparation and Removal of Uncured Adhesives

Sika® Remover-208 is used to remove uncured traces of Sikaflex® and SikaTack® products from tools and equipment. It is also suitable as a cleaner for non-porous and painted substrates prior to bonding.

**AVAILABLE ITEMS**
- Box with 4 × 1000 ml can, colorless  Item No. 34288
- Box with 12 × 400 ml aerosol, colorless  Item No. 135750
AUTOMOTIVE GLASS ACCESSORIES

From intelligent repair sets to easy-to-use applicator guns, our versatile accessories help you complete your Sika toolkit and increase the productivity of your working processes.

**Sika® Gun HD**

The Sika® Gun HD is a heavy duty, lightweight manual caulking gun for cartridges with a high gear ratio for easy, one-handed application. It is ideal for the manual application of Sika windscreen adhesives.

**YOUR BENEFITS**
- High gear ratio for easy, one-handed use
- Durable lightweight design (600 g)

**AVAILABLE ITEMS**
- Box with Sika® Gun HD  
  Item No. 452901

**Sika® Application Gun**

The Sika® Application Gun is the ideal dispenser for one-component windscreen adhesives. It is based on the Milwaukee C18PCG but comes with a clear barrel and improved extrusion plunger, increasing the adhesive yield of unipacks.

Box contents: Sika® Application Gun, 2Ah 18V Li-ion rechargeable battery, charger with EU/CH cord, spare parts set, documentation.

**AVAILABLE ITEMS**
- Box with Sika® Gun HD  
  Item No. 452901

**PowerCure Dispenser**

The PowerCure Dispenser is required to extrude PowerCure adhesives such as SikaTack® ELITE.

Box contents: Sika PowerCure Dispenser, 2Ah 18V Li-ion rechargeable battery, charger with EU/CH cord, spare parts set, documentation.

**AVAILABLE ITEMS**
- Box with 220V EU/CH 2Ah  
  Item No. 483561
- Box with 220V EU/UK 2Ah  
  Item No. 489272
AUTOMOTIVE GLASS ACCESSORIES
Automotive Glass Replacement

**Sika® Nozzle Cut**
Specially designed for fast and easy V-shape cutting of adhesive cartridge nozzles.

**AVAILABLE ITEMS**
- Box with Sika® Nozzle Cut
  - Item No.  92729

**Sika® Cleaner-350 H**
Hand Wipes
For the easy removal of fresh, uncured polyurethane or primer from your hands. Gentle cleansing for your skin and other surfaces.

**AVAILABLE ITEMS**
- Box with 6 × 70 pc bucket
  - Item No.  523490

**PowerCure Mixer Nozzles**
PowerCure adhesives such as SikaTack® ELITE require the use of PowerCure mixing nozzles.

**AVAILABLE ITEMS**
- Box with 50 units V-cut mixers
  - Item No.  483560
- Box with 40 units round mixer nozzles
  - Item No.  496783

**PowerCure Spare Parts**
Spare parts for the Power-Cure Dispenser are available to order online at: www.sika.com/powercure.

- Box with Li-Ion battery 18V 2Ah
  - Item No.  494106
- Box with spare cover, grey
  - Item No.  494111
- Box with hand pad, black
  - Item No.  494112
- Box with mixer cap, red
  - Item No.  494109
- Box with tooth rack cover, red
  - Item No.  494118

There is a range of spare parts available for small repairs on-site as well as the corresponding instructions.
OUTSTANDING SERVICE THANKS TO PowerCure

“On the commercial vehicle segment, the PowerCure solution from Sika allowed the introduction of a new, faster service level and to react more flexibly on customer appointments.”

TIPS AND TRICKS
### BLACK-PRIMERLESS PROCESS

**AUTOMOTIVE GLASS REPLACEMENT**

1. **Remove all decorative trims**
2. **Cover the aperture with masking tape**
3. **Cut out damaged windscreen using an electrical knife, cutting wire, cold knife etc.**
4. **Remove damaged windscreen**
5. **Dry fit new windscreen**
6. **Clean the new windscreen with Sika® Cleaner G+P**
7. **Activate the bonding surface of the glass using Sika® Aktivator PRO**
8. **Trim back the remaining adhesive bead to 1-2 mm**
9. **Clean the aperture using Sika® Cleaner G+P and activate the remaining bead with Sika® Aktivator PRO**
10. **Cover any minor damage to paint work using Sika® Primer-207. In case of larger areas contact your body shop or refer to the car manufacturer’s specification**
11. **Open the cartridge or the unipack**
12. **Apply a triangular bead of adhesive either to the glass or the aperture**
13. **Place the windscreen in position within the open time of the adhesive**
14. **Refit trims and mouldings**

---

**BONDING SURFACE**

In general, Sika® Cleaner G+P is ideal for removing traditional forms of surface contamination such as dirt, dust and skin oils that are commonly found on automotive glass parts. However, it has been Sika’s experience that many parts contain so-called non-

traditional contaminants that require additional treatment. The nature and quantity of such non-traditional contaminants can vary significantly. Generally, the source of this contamination is the manufacturing process itself.

- Mould release agents associated with encapsulated parts (where trim is bonded to the part)
- Silicone residue from a vacuum tube laminating process which is used for the lamination process of laminated safety glass

**Recommended Procedure**

1st step: Wet glass

2nd step: Check contamination

3rd step: Use fresh unit Sika® Cleaner PCA. Start cleaning ceramic frit

4th step: Immediate detection of removal effect visible

5th step: Dry with paper towel
BONDING PLASTIC WINDSCREENS
(PMMA AND PC)

Plastic windscreens can be found on vehicles such as:
- Construction machines
- Special purpose vehicles (police, army, etc.)
- Lightweight construction vehicles
- Roof modules on some vehicles

Typical materials used are PMMA (polymethacrylate) and PC (polycarbonate). In the manufacturing process, many polycarbonate sheets are coated with a scratch-resistant surface. Unlike standard float glass, plastic windscreens have a much higher thermal expansion coefficient, resulting in greater movement (expansion and contraction of the window). In addition, plastic windscreens do not have ceramic coating on the glass, nor any other integrated UV protection for the bond line. For these reasons, the following procedures must be followed when bonding plastic windscreens.

Permanent glazing
If the coating is unknown, it is recommended to test the surface before bonding (contact Sika for support); otherwise, use the following procedure:

<table>
<thead>
<tr>
<th>Step</th>
<th>Description</th>
<th>Result</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Abrade the bonding area with an abrasive pad (e.g. from Sika Abrasives) or sand paper</td>
<td>Remove scratch-resistant coating on the bonding area</td>
</tr>
<tr>
<td>2</td>
<td>Remove dust and clean surface with Sika® Cleaner G+P</td>
<td>Clean surface from dust</td>
</tr>
<tr>
<td>3</td>
<td>Apply Sika® Primer-207, flash off for 10 minutes</td>
<td>Create suitable surface for bonding</td>
</tr>
<tr>
<td>4</td>
<td>Apply Sikaflex®-223. Layer thickness as per table below</td>
<td>Bonding</td>
</tr>
</tbody>
</table>

Adhesive Thickness

<table>
<thead>
<tr>
<th>LARGEST WINDSCREEN LENGTH</th>
<th>TRIANGULAR BEAD REQUIRED</th>
<th>ADHESIVE BEAD DIMENSION*</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.5</td>
<td>8</td>
<td>6</td>
</tr>
<tr>
<td>1.0</td>
<td>8</td>
<td>8</td>
</tr>
<tr>
<td>1.5</td>
<td>12</td>
<td>10</td>
</tr>
<tr>
<td>2.0</td>
<td>16</td>
<td>12</td>
</tr>
<tr>
<td>Over 2.0 Meter</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

* Important: confirm to minimal adhesives thickness, D.

UV protection
To ensure a durable bond, the bond line of transparent windscreens must be protected against UV light. Possible solutions are:
- Suitable print color
- Protective metal or opaque plastic trims
- Sika® UV Shielding Tape

Without UV protection, Sika® Primer-207 will eventually wear off on the plastic windshield. The exact point at which this will result in a failure depends largely on the weather, the quality of the synthetic material and the general load.
SIKA FULL RANGE SOLUTIONS FOR CONSTRUCTION:

LIQUID APPLIED ROOFING  SINGLE PLY ROOFING  CONCRETE  CONCRETE REPAIR  STRUCTURAL STRENGTHENING  WATERPROOFING

JOINT SEALING  FAÇADE STRUCTURAL ADHESIVES  FLOORING  INDUSTRY  DISTRIBUTION

FOR MORE INFORMATION:

WHO WE ARE
Sika Limited and Sika Ireland Limited are part of the global Sika Group, specialising in the manufacture and supply of chemical based products. Sika have a leading position in the development and production of systems and products for bonding, sealing, damping, reinforcing, and protecting in the building sector and the motor vehicle industry. Sika has subsidiaries in 101 countries around the world and manufactures in over 200 factories. With more than 20,000 employees Sika generates annual sales of CHF 7.09 billion (£5.45bn). We are also committed to providing quality, service, safety and environmental care.

In the UK and Ireland, we provide market-leading solutions for concrete, waterproofing, roofing, flooring, refurbishment, sealing & bonding, and industry, and have manufacturing sites in Welwyn Garden City, Preston, Leeds and Dublin with more than 870 employees and a turnover of more than £260 million.

The information, and, in particular, the recommendations relating to the application and end use of Sika® products, are given in good faith based on Sika’s current knowledge and experience of the products when properly stored, handled and applied under normal conditions. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The proprietary rights of third parties must be observed. Please refer to our homepage www.sika.co.uk for our current standard terms & conditions applicable to all orders. Users should always refer to the most recent issue of the Product Data Sheet for the product concerned, copies of which will be supplied on request.
