

SIKA AT WORK

STREATHAM LEISURE CENTRE, LONDON

FLOORING: Sika® ComfortFloor®

BUILDING TRUST

STREATHAM LEISURE CENTRE, LONDON

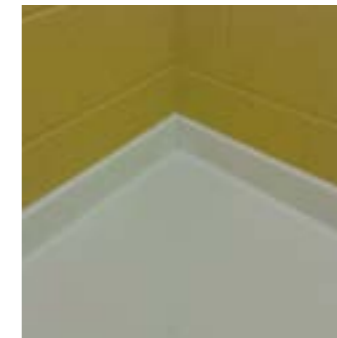

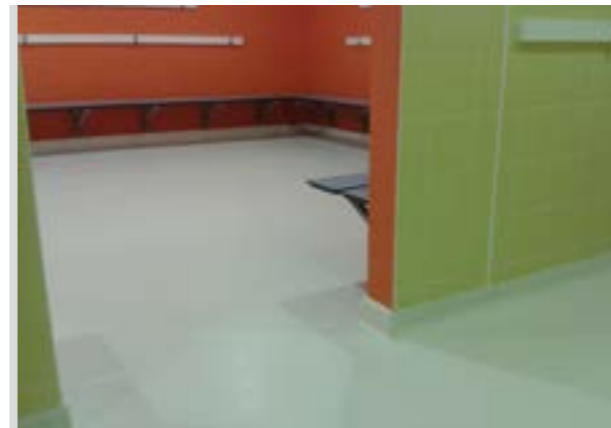

SEAMLESS SOLUTION FOR STREATHAM LEISURE CENTRE.

The seamless, durable and easy to maintain Sika® ComfortFloor® has found a new home at a £26 million Leisure Centre in Streatham.

Constructed by Vinci Construction UK Ltd on behalf of Spenhill Regeneration in partnership with the London Borough of Lambeth, the stunning new leisure centre includes an ice rink, swimming pool, sports hall, gym and forms part of the multimillion Streatham Hub Development. With durability key for the flooring of the leisure centre changing rooms and toilet facilities, Sika® ComfortFloor® was up for the challenge.

Combining noise suppression and durability with a flawless finish, Sika® ComfortFloor® proved to be the ideal solution - meeting the client's aesthetic requirements, whilst delivering a hard-wearing

STREATHAM LEISURE CENTRE, LONDON

system that guarantees outstanding long term performance. With this excellent technical and aesthetic solution, Sika helped to create a flooring system that could meet the daily demands of the leisure centre.

As well as ease of maintenance for the facility manager, the seamless Sika system offered toughness, durability and an increased life expectancy – in line with Sika's commitment to integrating sustainability into its research and development strategy, production processes and entire product range.

Sika approved flooring specialist Entech prepared and primed the floor using Sikafloor®-161 – a two part, low viscosity epoxy resin primer. A layer of Sikafloor®-330 was then applied to regulate and level the surface before a sealer layer of Sikafloor®-305W, completing the total system thickness of just 2mm.

Available in a range of colours to meet numerous aesthetic requirements, the decorative and durable system is weather and abrasion resistant ensuring longevity and minimal maintenance. Perfect for applications where exceptional hygiene standards are vital – it can provide a seamless solution for food preparation areas, commercial kitchens, hospitals and other healthcare facilities.

Sika provides a range of solutions to rejuvenate floors of virtually any size, shape, colour or technical requirement and as these solutions can be applied to a wide range of substrates – from old tiles to vinyl – they can stay in situ so specifiers do not have the added expense, time and landfill disposal of the old failed material.

Combining innovation in product development, the highest standards of manufacturing and technical expertise, Sika's comprehensive range of flooring solutions for domestic, commercial and industrial applications will meet and exceed client expectations, industry best practices, and building regulations and legislation.

The careful and considered choice of products for the new leisure centre perfectly demonstrates how the Sika® ComfortFloor® system can help deliver high performance and cost-effective solutions, with an efficient installation process suitable for the most challenging and innovative projects.
