

SikaMembran®-220 FR FIRE RETARDANT BUTYL TAPE

SikaMembran®-220 FR is a self-adhering fire retardant tape consisting of a butyl adhesive layer with a black aluminium foil outer layer which offers excellent waterproofing capability. It is designed for detailing around window and door openings, installed over the joint between the structure and incorporated units such as facade elements and windows to provide a secure and durable vapour barrier and waterproof seal. For ease of application, the rolls come with a split liner, positioned 30mm from the edge.

- Fire retardant tape, fire classification B-s1, d0*
- Easy, clean application
- Self-adhesive, with split liner
- Excellent adhesion to a wide variety of substrates
- Creates airtight and fire-safe detailing around the window and door frames.
