PRODUCT DATA SHEET
Sikadur®-30

Thixotropic epoxy adhesive for bonding reinforcement

PRODUCT DESCRIPTION
Sikadur®-30 is a thixotropic, structural 2-component adhesive, based on a combination of epoxy resins and special fillers, designed for use at normal temperatures between +8 °C and +35 °C.

USES
Sikadur®-30 may only be used by experienced professionals.

Adhesive for bonding structural reinforcement, particularly in structural strengthening works. Especially for the following uses:
- Sika® CarboDur® Plates to concrete, brickwork and timber (for details see the Sika® CarboDur® Product Data Sheet, the “Method Statement for Sika® CarboDur® Externally Bonded Reinforcement” Ref: 850 41 05 and the “Method Statement for Sika® CarboDur® Near Surface Mounted Reinforcement” Ref: 850 41 07).
- Steel plates to concrete (for details see the relevant Sika Technical information).

CHARACTERISTICS / ADVANTAGES
Sikadur®-30 has the following advantages:
- Easy to mix and apply.
- No primer needed.
- High creep resistance under permanent load.
- Very good adhesion to concrete, masonry, stone-work, steel, cast iron, aluminium, timber and Sika® CarboDur® Plates.
- Hardening is not affected by high humidity.
- High strength adhesive.
- Thixotropic: non-sag in vertical and overhead applications.
- Hardens without shrinkage.
- Different coloured components (for mixing control).
- High initial and ultimate mechanical resistance.
- High abrasion and shock resistance.
- Impermeable to liquids and water vapour.

ENVIRONMENTAL INFORMATION

APPROVALS / STANDARDS
- CIT n°290 18/07/2017 (certificato di idoneità tecnica all'impiego) ; Sika® CarboDur®, SikaWrap®, Sikadur®.
- Adhesive for structural bonding tested according to EN 1504-4, provided with the CE-mark.
- Concrete Society Technical Report No.55 Structural adhesive product specification compliant (FIG 12).
- Oxford Brookes University Test Certificate.
### PRODUCT INFORMATION

**Chemical Base**  
Epoxy resin

**Packaging**  
6 kg (A+B)  
Pre-batched unit  
pallets of 480 kg (80 x 6 kg)

**Shelf Life**  
24 months from date of production

**Storage Conditions**  
Store in original, unopened, sealed and undamaged packaging in dry conditions at temperatures between +5 °C and +30 °C. Protect from direct sunlight.

**Colour**  
Component A: white  
Component B: black  
Components A+B mixed: light grey

**Density**  
1.65 kg/l ±0.1 kg/l (components A+B mixed) (at +23 °C)

### APPLICATION INFORMATION

**Mixing Ratio**
Component A : Component B = 3 : 1 by weight or volume
When using bulk material the exact mixing ratio must be safeguarded by accurately weighing and dosing each component.

**Consumption**
Refer to Sika CarboDur Method Statement.

**Layer Thickness**
30 mm max.

**Sag Flow**
On vertical surfaces it is non-sag up to 3–5 mm thickness at 35 °C

**Squeezability**
4'000 mm² at +15 °C at 15 kg (FIP: Fédération Internationale de la Précontrainte)

**Product Temperature**
Sikadur®-30 must be applied at temperatures between +8 °C and +35 °C.

**Ambient Air Temperature**
+8 °C min. / +35 °C max.

**Dew Point**
Beware of condensation.
Substrate temperature during application must be at least 3 °C above dew point.

**Substrate Temperature**
+8 °C min. / +35 °C max.

**Substrate Moisture Content**
Max. 4 % pbw
When applied to matt damp concrete, brush the adhesive well into the substrate.

**Pot Life**

<table>
<thead>
<tr>
<th>Temperature</th>
<th>Potlife</th>
<th>Open time</th>
</tr>
</thead>
<tbody>
<tr>
<td>+8 °C</td>
<td>~120 minutes</td>
<td>~150 minutes</td>
</tr>
<tr>
<td>+20 °C</td>
<td>~90 minutes</td>
<td>~110 minutes</td>
</tr>
<tr>
<td>+35 °C</td>
<td>~20 minutes</td>
<td>~50 minutes</td>
</tr>
</tbody>
</table>

The pot-life begins when the resin and hardener are mixed. It is shorter at high temperatures and longer at low temperatures. The greater the quantity mixed, the shorter the pot-life. To obtain longer workability at high temperatures, the mixed adhesive may be divided into portions. Another method is to chill components A+B before mixing them (although not below +5 °C).

---

### VALUE BASE

All technical data stated in this Product Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

### LIMITATIONS

Sikadur® resins are formulated to have low creep under permanent loading. However, due to the creep behavior of all polymer materials under load, the long term structural design load must account for creep. Generally the long term structural design load must be lower than 20–25 % of the failure load.

A structural engineer must be consulted for load calculations for the specific application.

### ECOLOGY, HEALTH AND SAFETY

User must read the most recent corresponding Safety Data Sheets (SDS) before using any products. The SDS provides information and advice on the safe handling, storage and disposal of chemical products and contains physical, ecological, toxicological and other safety-related data.

### APPLICATION INSTRUCTIONS

#### SUBSTRATE QUALITY
See the Product Data Sheet of Sika® CarboDur® Plates and Sika® CarboDur® BC rods.

#### SUBSTRATE PREPARATION
See the “Method Statement for Sika® CarboDur® Externally Bonded Reinforcement” Ref: 850 41 05 and the “Method Statement for Sika® CarboDur® Near Surface Mounted Reinforcement” Ref: 850 41 07.
MIXING

Pre-batched units:
Mix components A+B together for at least 3 minutes with a mixing spindle attached to a slow speed electric drill (maximum 300 rpm) until the material becomes smooth in consistency and a uniform grey colour. Avoid aeration while mixing. Then, pour the whole mix into a clean container and stir again for approximately 1 more minute at low speed to keep air entrapment at a minimum. Mix only that quantity which can be used within its pot-life.

Bulk packing, not pre-batched:
First, stir each component thoroughly. Add the components in the correct proportions into a suitable mixing pail and stir correctly using an electric low speed mixer as above for pre-batched units.

APPLICATION METHOD / TOOLS

See the “Method Statement for Sika® CarboDur® Externally Bonded Reinforcement” Ref: 850 41 05 and the “Method Statement for Sika® CarboDur® Near Surface Mounted Reinforcement” Ref: 850 41 07.

CLEANING OF TOOLS

Clean all tools and application equipment with Sika® Thinner C immediately after use. Hardened / cured material can only be removed mechanically.

LOCAL RESTRICTIONS

Please note that as a result of specific local regulations the performance of this product may vary from country to country. Please consult the local Product Data Sheet for the exact description of the application fields.

LEGAL NOTES

The information, and, in particular, the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika’s current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika’s recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product’s suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request.
