## PRODUCT DATA SHEET

# Sikagard®-550 W Elastic

#### CRACK BRIDGING PROTECTIVE COATING FOR CONCRETE

#### PRODUCT DESCRIPTION

Sikagard®-550 W Elastic is a one component, plastoelastic coating based on UV-curing acrylic dispersion with excellent crack-bridging properties even at temperatures below 0 °C.

Sikagard®-550 W Elastic complies with the requirements of EN 1504-2 as protective coating.

#### **USES**

Sikagard®-550 W Elastic is used for protection and enhancement of concrete structures (normal and lightweight concrete), especially exposed outdoor concrete surfaces with a risk of cracking.

Sikagard®-550 W Elastic is used with concrete repair works as an elastic protective coating on Sika® smoothing mortar (refer to relevant product / system data sheet), fibre cement and overcoating of existing soundly adhering coatings

- Suitable for protection against ingress (Principle 1, method 1.3 of EN 1504-9),
- Suitable for moisture control (Principle 2, method 2.3 of EN 1504-9)
- Suitable for increasing the resistivity (Principle 8, method 8.3 of EN 1504-9)

### **CHARACTERISTICS / ADVANTAGES**

- Crack-bridging even at low temperatures (-20°C)
- High diffusion resistance against CO2 reducing the rate of carbonation
- Water vapour permeable
- Very good resistance against weathering and ageing
- Environmentally friendly (solvent free)
- Reduced tendency to dirt pick up and contamination
- The system is resistant to aggressive atmospheric influences

#### **APPROVALS / STANDARDS**

Complies with the requirements for Class 0, as defined in paragraph A13(b) of approved document B 'fire safety' to the Building regulations dated 20.11.2012 Nr 323721 & 323722

EN 1504-2 performance testing, LPM Report A-33'882-2 dated July 09

The product is included in a compilation of tested products and systems as per OS 5a (OS DII) at the German Institute of Road Systems

Determination of dynamic crack bridging properties according to EN 1062-7, report P8690a dated 27/08/2014, Kiwa Polymer Institut GmbH

#### PRODUCT INFORMATION

Chemical Base	Acrylate dispersion	
Packaging	15 l oval plastic pail	
Appearance / Colour	Thixotropic liquid available in almost every RAL colour shade.	
Shelf Life	12 months from date of production if stored properly in undamaged and unopened original sealed packaging.	
Storage Conditions	Store in cool and dry conditions. Protect from direct sunlight and frost.	

Product Data Sheet Sikagard®-550 W Elastic

February 2020, Version 01.02 020303030020000001

Density	~ 1.39 kg/l (at +20°C)
Solid content by weight	~ 66.1%
Solid content by volume	~ 53.4%
TECHNICAL INFORMAT	TION
Elongation at Break	Elongation at break

Elongation at Break	Elongation at break • at room temperature (not exposed to weathering): 120% • at -20°C: 70%		
Tensile Adhesion Strength	2,9 (2,8) N/mm²		(EN 1542)
Crack Bridging Ability	Class A1 (-20°C) - 2 coats Class B2 (-15°C) - 3 coats		(EN 1062-7)
Freeze Thaw De-Icing Salt Resistance	2,9 (2,1) N/mm² (EN 1		(EN 13687 part 1 & part 2)
Behaviour after Artificial Weathering	Pass after 2000 hours		(EN 1062-11)
Permeability to Water Vapour	Dry film thickness	d = 230 μm	(EN ISO 7783-1)
	Equivalent air layer thick- ness	SD, $H_2O = 0.35 \text{ m}$	(EN ISO 7783-2)
	Diffusion coefficient H <sub>2</sub> O	$\mu H_2 O = 1.5 \times 10^3$	
	Requirements for breath- ability	≤ 5 m	
Capillary Absorption	$w = 0.02 \text{ kg/(m}^2 \text{h}^{0.5})$		(EN 1062-3)
Permeability to CO2	Dry film thickness	d = 160 μm	(EN 1062-6)
	Equivalent air layer thickness	$S_{D}$ , $CO_2 = 51 \text{ m}$	
	Diffusion coefficient CO <sub>2</sub>	$\mu CO_2 = 3.1 \times 10^5$	
	Requirements for protection	SD, CO <sub>2</sub> ≥ 50 m

	ics (CO <sub>2</sub> equivalent air thickness of 50 m) $\approx$ 160 $\mu$ m.		
	ics (CO <sub>2</sub> equivalent air thickness of 50 m) $\approx$ 160 $\mu$ m. Minimum required dry film thickness to achieve full durability characteri		

Product Data Sheet Sikagard®-550 W Elastic February 2020, Version 01.02 020303030000000001

	ics (CO $_{\! 2}$ diffusion, adhesion after thermal cycling and crack bridging) $\approx 340$ $\mu m.$			
Ambient Air Temperature	+8°C min. / +35°C max.			
Relative Air Humidity	< 80%			
Dew Point	Temperature must be at least 3°C above dew point.			
Substrate Temperature	+8°C min. / +35°C max.			
Waiting Time / Overcoating	Waiting time between coats at +20°C substrate temperature:			
	Previous coating	Waiting time	Next coating	
	Sikagard®-552 W	5 hours min.	Sikagard®-550 W Elastic	
	Aquaprimer		_	
	Sikagard®-551 S Elastic Primer	18 hours min.	Sikagard®-550 W Elastic	
	Sikagard®-550 W Elastic	8 hours min.	Sikagard®-550 W Elastic	
	Note: When application is on existing coatings, the waiting time for both primers will increase by 100%.  Refresher coats of Sikagard®-550 W Elastic can be applied without priming if the existing coat has been thoroughly cleaned.			
Curing Treatment	Sikagard®-550 W Elastic does not require any special curing but must be protected from rain for at least 4 hours at +20°C.			
Applied Product Ready for Use	Full cure: ~ 7 days at +20°C			

#### APPLICATION INSTRUCTIONS

#### SUBSTRATE QUALITY / PRE-TREATMENT

Exposed concrete without existing coating:

- The surface must be dry, sound and free from loose and friable particles.
- Suitable preparation methods are steam cleaning, high pressure water jetting or blastcleaning.
- New concrete must be at least 28 days old.
- If required, a levelling pore sealer (e.g. Sika® Mono-Top®-620, Sikagard®-720 EpoCem®, Sikagard®-545 W Elastofill, etc.) shall be applied - refer to the respective product data sheet. For cement based products, allow a curing time of at least 4 days before coating (except when the EpoCem is used, then coating can be applied within 24 hours).

Exposed concrete with existing coating:

- Existing coatings must be tested to confirm their adhesion to the substrate and their suitability - adhesion test average > 0.8 N/mm2 with no single value below 0.5 N/mm2.
- For water based coating, use Sikagard-552 W AquaPrimer as primer.
- For solvent based coating, use Sikagard-551 S Elastic Primer as primer.
- If coating type is unknown, carry out adherence testing to determine which primer is most suitable - wait at least 2 weeks prior to conduct the adhesion test an average value of 0.8 N/mm<sup>2</sup> is required with no single value below 0.5 N/mm<sup>2</sup>.

#### APPLICATION

Apply Sikagard®-551 S Elastic Primer or Sikagard®-552 W AquaPrimer evenly onto the substrate. For use on very dense substrates up to 10% Sika Thinner C may be added to Sikagard®-551 S Elastic Primer. Sikagard®-550 W Elastic can be applied by brush, roller or airless spray.

#### **CLEANING OF TOOLS**

Clean all tools and application equipment with clean water immediately after use.

Hardened / cured material can only be removed mechanically.

For Sikagard®-551 S Elastic Primer use Sika® Thinner C.

#### **LIMITATIONS**

Do not apply when there is:

- Expected rain
- Relative humidity > 80%
- Temperature below +8°C and/or below dew point
- Concrete younger than 28 days

Aplication during cold temperatures below recommended application temperatures may reduce adhe-

Sikagard® 550W Elastic is not a chemical resistant

Dark colour shades (especially black, dark red and blue, etc.) may fade more rapidly than other lighter tone colours. A refreshing coat might be required at an earlier interval than usual.

Where colour fade may occur the protective properties of the coating will remain unaffected

#### **VALUE BASE**

All technical data stated in this Product Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

#### LOCAL RESTRICTIONS

Please note that as a result of specific local regulations the performance of this product may vary from country to country. Please consult the local Product Data Sheet for the exact description of the application fields

#### **ECOLOGY, HEALTH AND SAFETY**

For information and advice on the safe handling, storage and disposal of chemical products, users shall refer to the most recent Safety Data Sheet (SDS) containing physical, ecological, toxicological and other safety-related data.

## DIRECTIVE 2004/42/CE - LIMITATION OF EMISSIONS OF VOC

According to the EU-Directive 2004/42, the maximum allowed content of VOC (Product category IIA / c type wb) is 40 g/l (Limits 2010) for the ready to use product.

The maximum content of Sikagard®-550 W Elastic is < 40 g/l VOC for the ready to use product.

#### **LEGAL NOTES**

The information, and, in particular, the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika's recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product's suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request.
