MARKET GATES CAR PARK GREAT YARMOUTH

Before

After

SIKA PROVIDES A FULLY WATERPROOF DECKING SOLUTION FOR MARKET GATES CAR PARK.

At the Market Gates shopping centre in Great Yarmouth, the exposed asphalt decks of the car park were showing signs of ageing and weathering. With removal and replacement costly and time-consuming over the retail areas, [Sikafloor® RB58 Pronto](#) deck system from Sika was laid directly onto the existing asphalt to create a watertight, non-slip car park deck system, returning the car park to full use within the shortest time possible. The area above the retail units is to receive a photovoltaic generating system on the exposed top deck. The use of the [Sikafloor® RB58 Pronto](#) enabled works to be carried out in winter months allowing for the installation of the solar panels within the program.

Following a successful trial to demonstrate its bond to the substrate, approximately 2,000m² of [Sikafloor® RB58 Pronto](#) was applied over the existing asphalt to provide a slip resistant and hard wearing waterproof surface. Utilising the fast setting properties of [Sikafloor® RB58 Pronto](#) decking system also ensured works could be completed quickly, with minimal disruption and eliminating the need for material to go to landfill.

Offering excellent mechanical and chemical resistance, [Sikafloor® RB58 Pronto](#) has been fully tested to meet the highest crack bridging standards available on the market – including BS EN1062-7 Method B, which tests the complete system through 20,000 crack cycles up to 0.5mm @ -20°C. This demonstrates the system's ability to protect against water penetrating through the membrane and ensures the future integrity of the deck.

With a comprehensive range of car park decking and full concrete repairs systems, [Sika](#) provides a variety of solutions designed to meet the harsh conditions that car parks are subject to, and provide durability, cost effectiveness and an excellent finish. Following the successful renovation of the Market Gates roof top car park area, Sika and their specialist contracting partner, have delivered a bright, aesthetically appealing and safe car parking area.
