

SikaMembran® Universal

VAPOUR/WATERPROOFING MEMBRANE FOR FACADES

SikaMembran® Universal provides a durable vapour barrier and waterproof seal at junctions between building elements such as window installations. It is a fully proven system when used with SikaBond® TF plus N, an adhesive developed for the durable fixation of the EPDM sheet membrane to many kinds of construction materials.

- Highly flexible waterproofing and vapour control system
- Provided with CE-mark according to EN 13984: 2011
- No additional mechanical fixing necessary
- Membrane pre-treatment free
