LIMITATIONS

- Freshly applied Sikalastic® OneShot PB-56 UV must be protected from damp, sweat, condensation and water for at least 2 hours
- The incorrect assessment and treatment of cracks may lead to a reduced service life and reflective cracking
- For exact colour matching, ensure Sikafloor®-359 N is applied from the same control batch number
- If heating is required do not use gas, oil, paraffin or other fossil fuel heaters, these produce large quantities of both CO₂ and H₂O water vapour, which may adversely affect the finish. For heating use only electric powered warm air blower systems.
- Always ensure adequate fresh air ventilation during application and curing
