

## PRODUCT DATA SHEET

# Cromar® PROGRP Finishing Tissue

Glass fibre tissue to improve detailing.

## PRODUCT DESCRIPTION

Cromar® PROGRP Finishing Tissue provides neat finishes on visible moulded corners and gives a smooth detail on roof penetrations.

Cromar® PROGRP is a Glass Reinforced Polyester flat roof system designed and engineered for flat roof applications. PROGRP is a fully integrated all in one system where the components work together on virtually all types of flat roofs and vertical surfaces in any domestic or commercial application to provide the perfect all-weather protection.

## USES

- For ensuring neat finish on visible moulded corners or tidying up details such as roof penetrations.

## CHARACTERISTICS / ADVANTAGES

- Cold applied - No heat needed
- Easy to form
- Durable - Resists heavy foot traffic
- Virtually maintenance free
- Impact resistant
- Storm proof
- Frost proof

## PRODUCT INFORMATION

<b>Packaging</b>	10 rolls per cardboard box.
<b>Colour</b>	White
<b>Shelf Life</b>	12 months
<b>Storage Conditions</b>	The product must be stored properly in undamaged packaging, in dry conditions at temperatures between +5 °C and +30 °C.
<b>Length</b>	250 m
<b>Width</b>	100 mm
<b>Thickness</b>	1 mm

## VALUE BASE

All technical data stated in this Product Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

## ECOLOGY, HEALTH AND SAFETY

User must read the most recent corresponding Safety Data Sheets (SDS) before using any products. The SDS provides information and advice on the safe handling, storage and disposal of chemical products and con-

tains physical, ecological, toxicological and other safety-related data.

## APPLICATION INSTRUCTIONS

Lay the Finishing Tissue

- Place the tissue directly onto the wet resin.
- Smooth gently with a brush or roller to ensure:
  - Full wet-out
  - No wrinkles or trapped air

*Note:* Finishing tissue is much lighter than structural CSM and saturates quickly.

Use a small paddle/bubble-buster roller to remove air pockets and achieve a seamless surface.

Apply a second coat of catalysed resin over the tissue to fully encapsulate it.

Ensure edges are feathered for an invisible finish.

## LOCAL RESTRICTIONS

Please note that as a result of specific local regulations the performance of this product may vary from country to country. Please consult the local Product Data Sheet for the exact description of the application fields.

## LEGAL NOTES

The information, and, in particular, the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika's recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product's suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request.
