

SIKA AT WORK

RAILWAY INSPECTION PIT. LONDON

FLOORING: Sikafloor® and Sikaflex®

BUILDING TRUST

RAILWAY INSPECTION PIT, LONDON

SIKA FLOORING CONTINUES THE OLYMPIC LEGACY AT VELODROME.

The upgrading of the floors and maintenance areas at Southern Railways Selhurst depot was carried out using a full range of systems supplied by Sika Limited. These solutions will ensure that all areas will be protected from further deterioration ensure health and safety conditions are met whilst also providing an esthetically pleasing environment for the workers.

The system consisted of Sikafloor®-161, Sikafloor®-264, Sikafloor®-91, Sikagard® Wallcoat and Sikaflex® Pro-3WF. The solution provided a bright coloured floor that can be installed in a wide range of thicknesses and with a variety of surface textures. They are seamless, non-porous and non-dusting with good chemical resistance. These properties make the floor hygienic and easy to clean as well as hard and durable, so they are ideally suited for a wide range of applications.

Sikafloor®-264 is a two part epoxy roller and seal coat and is an economical coloured epoxy resin. This product can be roller coated for concrete and cement screeds with normal up to medium heavy wear e.g. storage and assembly halls, maintenance workshops, garages and loading ramps. It can also be used as a seal coat for broadcast systems, such as multi-storey and underground car parks, maintenance hangars and for wet process areas, e.g. beverage and food industry.

The advantages of using Sikafloor®-264 is that it has good chemical and mechanical resistance, easy to apply, liquid proof, gloss finish and a slip resistant surface is possible.
