

# CASE STUDY

## KRAKOW AIRPORT

### POLAND

**REQUIREMENT:** To repair and replace areas of damaged concrete paving and sealant joints (taxiways and aircraft stands). A fast return to service to minimise operational disruption was essential. Therefore, the works were carried out overnight and the expected curing speeds were achieved. Sika concrete repair mortars, concrete admixtures and Sikaflex®-406 KC joint sealant provided the one-stop shop solution

**PRODUCTS:** Sikaflex®-406 KC and Sikaflex®-406 KC Booster
