

PRODUCT DATA SHEET

Sika® Patio Wizard

Effectively removes algae, green growth, mould & fungi

PRODUCT DESCRIPTION

Sika® Patio Wizard is a powerful mould and algae treatment designed to clean and kill all types of green growth without the need for rinsing, scrubbing, or pressure washing. The formulation does not contain any bleach or acids, making it safe for a wide range of surfaces. This surface biocide is suitable for both amateur and professional use, effectively eliminating mould, algae, lichen, green slime, and other fungal growth, either to clean and restore surfaces or to prepare them for subsequent treatments.

USES

- Stone, brick, wood, and concrete.
- Paths, patios, paving slabs, driveways, and block pavers.
- Roofs - before applying roof coatings.
- Outdoor furniture and glass greenhouses.
- Glass, perspex, ceramics, wallpaper, paintwork, plaster, ceilings, ceramic tiles, grout, baths, showers, and sinks - indoor use is for professional operators only.
- Ideal for removing green growth from surfaces prior to treatments including painting, staining or sealing.

CHARACTERISTICS / ADVANTAGES

- Leave-in treatment - no need for washing or scrubbing.
- Powerful and fast-acting formula.
- Kills infestation in 1-3 days.
- High coverage - dilute to cover up to 180 m².
- Long lasting protection from re-growth.

APPROVALS / STANDARDS

Sika® Patio Wizard is approved under the Control of Pesticides Regulation 1986 (as amended) and regulations (Northern Ireland) 1987 (as amended) for use as directed. HSE No. 10443 - GB / 10443-NI.

PRODUCT INFORMATION

Packaging	5 L plastic containers.
Shelf Life	24 months from the date of manufacture when stored in original, unopened container under the recommended storage conditions.
Storage Conditions	Store upright in original, tightly sealed container, and in a dry, cool and well ventilated area (+5 °C and +30 °C), protected from sunlight and frost.
Yield	A 5 L concentrate pack will treat up to 180 m ² at an application rate of 6 m ² /L diluted. Coverage will depend on the porosity of the substrate and the level of soiling.

VALUE BASE

All technical data stated in this Product Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

LIMITATIONS

- Do not apply if rain is imminent or expected within 6 hours.
- Dilute only as directed.
- For use only as specified as a surface biocide.
- On heavily soiled areas 2 applications may be required.

ECOLOGY, HEALTH AND SAFETY

User must read the most recent corresponding Safety Data Sheets (SDS) before using any products. The SDS provides information and advice on the safe handling, storage and disposal of chemical products and contains physical, ecological, toxicological and other safety-related data.

APPLICATION INSTRUCTIONS

SURFACE PREPARATION

Remove all surface debris such as leaves, twigs, loose soil, or weeds prior to application. Do not apply if rain is imminent or expected within 6 hours. Whilst this product is designed to be safe to use on most 'water safe' surfaces, we recommend that you test a small inconspicuous area first.

APPLICATION

Dilute with water at a rate of 1 Part Sika® Patio Wizard to 5 Parts water (e.g. add 500 ml Sika® Patio Wizard to 2.5 L water), mix briefly before applying. Apply by watering can with a rose sprayer, garden sprayer, paint brush or sweeping brush depending upon area to be treated. Apply at a rate of 1 litre diluted solution per 3 - 6 m². After applying simply leave for 1 - 3 days and the green growth will slowly disappear (in a similar manner to the way weed killers work). For heavily contaminated surfaces, a second application may be required. Safe for children and pets once dry.

Professional operators (for internal and external use):

For internal use only by professional operators. The COSHH (Control of Substances Hazardous to Health) Regulations 2002 (as amended) apply to the use of this product at work. For external use all amateur conditions also apply.

Amateur (for external use only):

Do not contaminate foodstuffs, eating utensils or food contact surfaces. For outdoor use only. Keep away from treated surfaces until dry. Keep in a safe place. This material and its container must be disposed of in a safe way. Wash hands and exposed skin before meals and after use.

LOCAL RESTRICTIONS

Please note that as a result of specific local regulations the performance of this product may vary from country to country. Please consult the local Product Data Sheet for the exact description of the application fields.

LEGAL NOTES

The information, and, in particular, the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika's recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product's suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request.
