

PRODUCT DATA SHEET

Magnetic Filter

A powerful, high performance magnetic filter for central heating systems

PRODUCT DESCRIPTION

Magnetic Filter is a powerful, high performance in-line magnetic filter with superior magnetic and non-magnetic collection capacity. It is easy to fit, fast and easy to clean as well as being able to fit vertical and horizontal pipework.

USES

For protecting domestic central heating systems.

PRODUCT INFORMATION

Packaging	Box
Storage Conditions	Physical item, no anticipated shelf life provided it is kept clean and dry

FURTHER DOCUMENTS

Why fit a magnetic filter?

Even with a corrosion inhibitor/protector chemical, low levels of corrosion can still occur, forming magnetite. These particles can disperse throughout the system, causing blockages or restrictions that can result in a loss of energy performance and failure of system parts.

CHARACTERISTICS / ADVANTAGES

- Tested to 10 bar working pressure to ensure ultimate efficiency and high performance clean.
- Flow rate of 50 L/min.
- Superior 9000 Gauss Neodymium magnetic assembly.
- Made from high quality glass fibre reinforced nylon plastic.
- Valves included.

Everbuild Magnetic Filter collects magnetic and non-magnetic particles and any other debris that flows through the system. It offers protection without reducing or restricting the flow rate through the system.

Installation:

To achieve the best protection, it is recommended that Everbuild Magnetic Filter is fitted on the return, after the last radiator before the boiler.

LIMITATIONS

Magnets may affect or interfere with sensitive mechanical and electronic instruments such as heart pacemakers, computers and magnetic media and watches. Always keep magnets at least 300 mm (1 foot) away from such devices

LOCAL RESTRICTIONS

Note that as a result of specific local regulations the declared data and recommended uses for this product may vary from country to country. Consult the local Product Data Sheet for exact product data and uses.

LEGAL NOTES

The information, and, in particular, the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika's recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product's suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request.
