

SIKA AT WORK

MILITARY HOSPITAL, MIDDLE EAST

ROOFING: Sika Liquid Plastics Sikalastic® 618

MILITARY HOSPITAL, MIDDLE EAST

PROJECT REQUIREMENTS

The mineral felt roof of this three storey private hospital required refurbishment. The chosen system needed to be capable of being applied in the heat of the Middle East.

SIKA LIQUID PLASTICS SOLUTION

A 10 year Sikalastic® 618 system from Sika Liquid Plastics was chosen for the project. This is a single component, cold applied system which can be installed using airless spray application. Once completed it forms a seamless, durable and weather resistant membrane suitable for use on exposed roof areas.

The Sikalastic® 618 system was chosen because it offers a cost effective solution but a high quality finish. The contractor and client were both very pleased with the results of the product and the high standard achieved.

PROJECT PARTICIPANTS

Product: Sika Liquid Plastics Sikalastic® 618

Size: 6000m²

Contractor: Dicotech LLC

Our most current General Sales Conditions shall apply.
