Sikaplan[®]-SGK 1.8 (Trocal[®] SGK 1.8 mm)

Polymeric membrane for roof waterproofing

| Product Description | Sikaplan [®] -SGK 1.8 (Trocal [®] SGK 1.8 mm) is a multi-layer, synthetic roof waterproofing sheet based on premium-quality polyvinyl chloride (PVC) with inlay of glass non-woven and polyester fleece backing according to EN 13956. | |
|------------------------|--|--|
| Uses | Roof waterproofing membrane for exposed flat roofs: | |
| | Partially adhered by Sika-Trocal [®] C 300 adhesive. | |
| | Loose laid and mechanically fastened. | |
| Characteristics / | Outstanding resistance to weathering, including permanent UV irradiation | |
| Advantages | High resistance to ageing | |
| | High resistance to hailstones | |
| | Resistant to all common environmental influences | |
| | High resistance to mechanical influences | |
| | High tensile strength | |
| | High dimensional stability | |
| | Excellent flexibility in cold temperatures | |
| | High water vapour permeability | |
| | Outstanding weldability | |
| | Optimized adhesion to substrate by polyester fleece backing | |
| | Polyester backing provides separation to bitumen surfaces | |
| | Recyclable | |
| Approval / Standards | Polymeric sheets for roof waterproofing according to EN 13956, certified by notified body 1213-CPD-4125 and provided with the CE-mark. | |
| | Reaction to fire according to EN 13501-1. | |
| | External fire performance tested according to ENV 1187 and classified according to EN 13501-5: BROOF(t1) and BROOF(t3). | |
| | Official Quality Approvals and Agrement Certificates and approvals. | |
| | Monitoring and assessment by approved laboratories. | |
| | Quality Management system in accordance with EN ISO 9001/14001. | |
| | Production according to Responsible Care policy of Chemical Industry. | |

| Appearance / Colours | Surface: | slightly structured |
|------------------------------------|--|--|
| | Colours: | |
| | Top surface: | light grey (nearest RAL 7047) |
| | Bottom surface: | dark grey |
| | Top surface of she order quantities. | et in other colours available on request, subject to minimum |
| Packaging | Packing unit: s | ee price list |
| | Roll length: 1 | 2.50 m |
| | Roll width: | 2.00 m |
| | Roll weight: 6 | 2.50 kg |
| Storage Conditions / Shelf-Life | Rolls must be stored in a horizontal position on pallet and protected from direct sunlight, rain and snow. Product does not expire during correct storage. | |
| | Do not stack pallet | s of rolls during transport or storage. |

Technical Data

| Technical Data | | |
|--|---|---|
| Product Declaration | EN 13956 | |
| Visible defects | Pass | EN 1850-2 |
| Length | 12.50 m (- 0 % / + 5 %) | EN 1848-2 |
| Width | 2.00 m (- 0.5% / + 1%) | EN 1848-2 |
| Straightness | ≤ 30 mm | EN 1848-2 |
| Flatness | ≤ 10 mm | EN 1848-2 |
| Effective thickness | 1.8 mm (- 5 % / + 10 %) | EN 1849-2 |
| Mass per unit area | 2.5 kg/m² (- 5% / + 10%) | EN 1849-2 |
| Water tightness | Pass | EN 1928 |
| Effects of liquid chemicals, including water | On request | EN 1847 |
| External fire performance Part 1-4 | BROOF(t1)<20°, ≥ 20°, BROOF(t3) <10°/<70° | EN 13501-5 |
| Reaction to fire | Class E | EN ISO 11925-2, classification to EN 13501-1 |
| Hail resistance | | EN 13583 |
| rigid substrate flexible substrate | ≥ 25 m/s ≥ 32 m/s | |
| Joint peel resistance | \geq 300 N/50 mm | EN 12316-2 |
| Joint shear resistance | ≥ 500 N/50 mm | EN 12317-2 |
| Water vapour transmission properties | μ = 20'000 | EN 1931 |
| Tensile strength | | EN 12311-2 |
| longitudinal (md) ¹⁾ transversal (cmd) ²⁾ | ≥ 600 N/50 mm ≥ 600 N/50 mm | |

| System Information | |
|------------------------------------|--|
| System Structure | Ancillary products according to local price list: |
| | Sikaplan[®]-18 D or Sikaplan[®]-S 1.5 (Trocal[®] S, 1.5 mm) unreinforced sheet for detailing. |
| | Sikaplan[®]-15 G or Sikaplan[®]-SG 1.5 (Trocal[®] SG, 1.5 mm) roofing sheet for stripes. |
| | Moulded corner pieces, prefabricated corners and pipe flashings Sika-Trocal[®] Metal Sheet Type S |
| | Sarnabar for peel stop Sika-Trocal[®] Cleaner 2000 |
| | Sika-Trocal[®] Cleaner L 100 Sika-Trocal[®] Welding Agent |
| | Sika-Trocal[®] Seam Sealant Sika-Trocal[®] C 300 (One-component PU adhesive for surface bonding) |
| | Sika-Trocal[®] C 733 (Contact adhesive) |
| Application Details | |
| Substrate Quality | The substrate surface must be uniform, smooth and free of any sharp protrusions or burrs, etc. |
| | In case of adhesion by Sika-Trocal $^{\ensuremath{\$}}$ C300, all layers of the built-up and substrate must be secured against wind uplift. |
| | The Polyester fleece laminated to Sikaplan [®] -SGK 1.8 (Trocal [®] SGK 1.8 mm) underside separates sufficiently from any incompatible substrate. It prevents from direct contact to bitumen or plastic material, e.g. expanded polystyrene (EPS), extruded polystyrene (XPS), polyurethane (PUR), polyisocyanurate (PIR) or phenolic foam (PF) for compatibility in the built-up. |
| Application Conditions / Limits | |
| Temperature | The use of Sikaplan [®] -SGK 1.8 (Trocal [®] SGK 1.8 mm) membranes is limited to geographical locations with average monthly minimum temperatures of -25 °C. Permanent ambient temperature during use is limited to +50 °C. |
| Compatibility | The PVC compound is not compatible with direct contact to other plastics, e.g. EPS, XPS, PUR, PIR or PF. |
| | The PVC compound is not resistant to tar, bitumen, oil and solvent containing materials. |
| | Compatibility to bitumen or plastic surfaces below the membrane is achieved by incorporated Polyester fleece backing. |

| Installation Instructions | |
|--------------------------------|--|
| Installation Method / Tools | Installation procedure: According to the valid installation instructions of manufacturer for Sikaplan [®] SGK (Trocal [®] SGK)-types for adhered system. |
| | Fixing Method: Partially adhered by Sika-Trocal [®] C 300 adhesive. Adhesive is applied to substrate in strips out of the container and spread into thin film by squeegee. The sheet is rolled out into adhesive bed to bond instantly to the |
| | polyester fleece surface. The roof perimeter is mechanically fixed by Sarnabar or Sika-Trocal [®] Metal Sheet Type S profile to create a peel stop. |
| | Loosely laid and mechanically fastened: The roof waterproofing membrane is installed by loose laying and mechanical fastening in seam overlaps or independent from overlaps. |
| | Welding Method: Overlap seams are welded by electric hot welding equipment, such as manual hot air welding machines and pressure rollers or automatic hot air welding machines with controlled hot air temperature capability of minimum 600 °C. |
| | Recommended type of equipment: LEISTER TRIAC PID for manual welding LEISTER VARIMAT for automatic welding |
| | Welding parameters including temperature, machine speed, air flow, pressure and machine settings must be evaluated, adapted and checked on site according to the type of equipment and the climatic situation prior to welding. The effective width of welded overlaps should be minimum 20 mm. |
| | If local weather conditions allow cold welding of sheet overlaps with Sika-Trocal [®] Welding Agent, it is permitted for Sikaplan [®] -SGK 1.8 (Trocal [®] SGK 1.8 mm) system for exposed roofs. The effective width of welded overlap by cold welding must be 30 mm. |
| | The seams must be mechanically tested with screw driver or steel needle to ensure the integrity/completion of the weld. Any imperfections must be rectified by hot air welding. |
| | Cold welded seam edges must be sealed by Sika-Trocal [®] Seam Sealant after testing. |
| Notes on Installation / | Installation works must be carried out only by Sika instructed contractors for roofing. |
| Limits | Temperature limits for the installation of the membrane: |
| | Substrate temperature: -25 °C min. / +60 °C max. for hot air welding +5 °C min. / +60 °C max. for cold welding |
| | Ambient temperature: -15 °C min. / +60 °C max. for hot air welding +5 °C min. / +60 °C max. for cold welding |
| | Installation of some ancillary products, e.g. contact adhesives/thinners is limited to temperatures above +5 °C. Please refer to the respective Product Data Sheets. |
| | Special measures may be compulsory for installation below +5 °C ambient temperature due to safety requirements in accordance with national regulations. |
| | |

| Value Base | All technical data stated in this Product Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control. |
|--|---|
| Local Restrictions | Please note that as a result of specific local regulations the performance of this product may vary from country to country. Please consult the local Product Data Sheet for the exact description of the application fields. |
| Ecology, Health and Safety Information | A Safety Data Sheet following EC-Regulation 1907/2006, Article 31 is not needed to bring the product to the market, to transport or to use it. The product does not damage the environment when used as specified. |
| REACH | European Community Regulation on chemicals and their safe use (REACH: EC 1907/2006) |
| | |
| | This product is an article within the meaning of Regulation (EC) No 1907/2006 (REACH). It contains no substances which are intended to be released from the article under normal or reasonably foreseeable conditions of use. Therefore, there are no registration requirements for substances in articles within the meaning of Article 7.1 of the Regulation. |
| | Based on our current knowledge, this product does not contain SVHC (substances of very high concern) from the candidate list published by the European Chemicals Agency in concentrations above 0.1 $\%$ (w/w). |
| Protective Measures | Fresh air ventilation must be ensured, when working (welding) in closed rooms. Local safety regulations must be observed. |
| Transportation Class | The product is not classified as hazardous good for transport. |
| Disposal | The material is recyclable. Disposal must be according to local regulations. Please contact your local Sika sales organisation for more information. |
