

SIKA AT WORK

DEBENHAMS, BASILDON

ROOFING: Sika Liquid Plastics Decothane Omega 15

DEBENHAMS, BASILDON

PROJECT DESCRIPTION

Debenhams in Basildon is situated in the town centre, at the Eastgate shopping centre. With 126 department stores, Debenhams is one of the largest retailers in the UK and Ireland.

PROJECT REQUIREMENTS

The roof was originally covered in mineral felt and had air conditioning units scattered over the 5000m². However, the mineral felt had failed; this had caused water ingress into the building below from areas on the roof where standing water had formed. To identify these areas, a thermal image was taken of the roof. The areas that had saturated insulation had to be replaced prior to coating.

SIKA LIQUID PLASTICS SOLUTION

Decothane Omega 15 system from Sika Liquid Plastics was specified. This consists of an initial coat of Decothane into which Reemat Premium is embedded. Once dry, another coat of Decothane is applied.

Due to its cold application, the new Decothane seamless waterproofing system could be safely installed without the need for heat or naked flame and without having to shut down the store below. Decothane rapidly becomes resistant to rain damage and because it is liquid applied, it can be easily applied around detail areas such as rooflights, pipe penetrations and upstands to provide highly durable waterproof protection that is guaranteed to last for at least 15 years.

PROJECT PARTICIPANTS

Size: 5000m²

Product: Sika Liquid Plastics Decothane Omega 15

Client: Debenhams

Contractor: Millane Contract Services Limited

Our most current General Sales Conditions shall apply.
Please consult the Data Sheet prior to any use and processing.
