

PRODUCT DATA SHEET

Cromar® Through-Wall Parapet Outlet

Parapet outlet as part of PRO GRP and Flexiglass liquid roof systems

PRODUCT DESCRIPTION

This Cromar® Through Wall Parapet Outlet is a hot-press-moulded, versatile and long-lasting trim accessory that's part of the PRO GRP and Flexiglass liquid roof systems. This through-wall parapet is used to facilitate the drainage of water from a flat roof or a parapet wall, acting as a conduit for rainwater to flow from the roof, through the wall, and out of the building.

Cromar® Through Wall Parapet Outlet has great strength, durability and weather resistance properties, which means it can withstand harsh weather conditions and is able to direct water away from buildings even in the most challenging conditions. By preventing water build-up on your roof and directing the water away from vulnerable areas, you can reduce the risks of leaks, structural damage and water ingress into the building.

USES

- Cromar® Through Wall Parapet Outlet is used with D wall fillet trims, these wall outlets are made from GRP for full compatibility.
- Used to facilitate the drainage of water from a flat roof or parapet wall.
- Helps to prevent water build-up on roofs.

CHARACTERISTICS / ADVANTAGES

- Part of the PRO GRP and Flexiglass liquid roof systems.
- Maintains the integrity of the building's exterior.
- Good strength, durability and weather resistance.
- Hot-press-moulded, versatile and long-lasting trim accessory.
- Reduces the risk of leaks, structural damage and water ingress.

Storage Conditions	The product must be stored properly in undamaged packaging, in dry conditions at temperatures between +5 °C and +30 °C

VALUE BASE

All technical data stated in this Product Data Sheet are based on laboratory tests. Actual measured data may

vary due to circumstances beyond our control.

ECOLOGY, HEALTH AND SAFETY

This product is an article as defined in article 3 of regu-

lation (EC) No 1907/2006 (REACH). It contains no substances which are intended to be released from the article under normal or reasonably foreseeable conditions of use. A safety data sheet following article 31 of the same regulation is not needed to bring the product to the market, to transport or to use it. For safe use follow the instructions given in the product data sheet. Based on our current knowledge, this product does not contain SVHC (substances of very high concern) as listed in Annex XIV of the REACH regulation or on the candidate list published by the European Chemicals Agency in concentrations above 0,1 % (w/w).

APPLICATION INSTRUCTIONS

Complete all roof work in line with British Standard code of conduct.

LOCAL RESTRICTIONS

Please note that as a result of specific local regulations the performance of this product may vary from country to country. Please consult the local Product Data Sheet for the exact description of the application fields.

LEGAL NOTES

The information, and, in particular, the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika's recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product's suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request.
