

SIKA AT WORK

SUNNINGDALE HEIGHTS, WIRRAL

REFURBISHMENT: Sikafloor® Balcony System

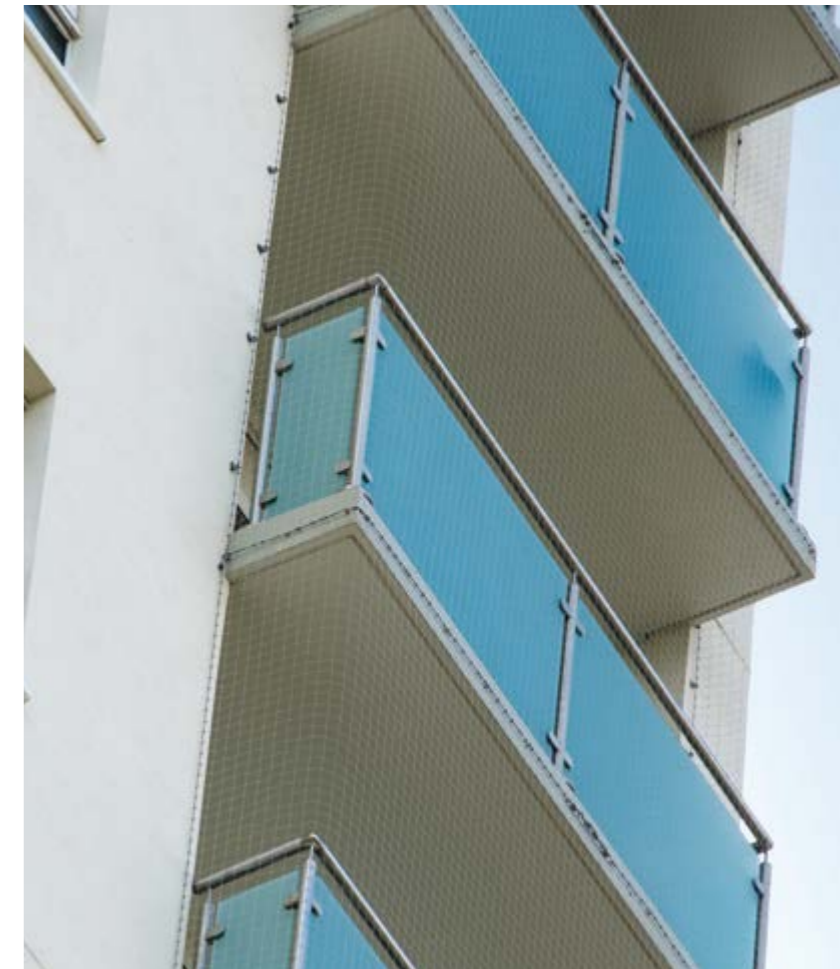

BUILDING TRUST

SUNNINGDALE HEIGHTS, WIRRAL

SIKA COMPLETES HIGH QUALITY CONCRETE TOWER BLOCK REFURB. Sika has provided a fast, efficient and long term concrete repair solution to the balconies at Sunningdale Heights, one of six high rise tower blocks on the Wirral which are currently under repair as part of an ambitious £32 million refurbishment programme by client Magenta Living.

Built in the sixties, the 14 storey tower block in Moreton required refurbishment due to concrete deterioration. With the intention of repairing and protecting to provide longevity and extend the life of the building, the main contractor required a concrete repair system that would allow the extensive refurbishments to be carried out with the minimum of disruption to residents.

SUNNINGDALE HEIGHTS WIRRAL

With its ability to be laid and trafficked in the same day the fast cure Sikafloor®-415 Elastomeric walkway and balcony system was the ideal solution for the recoating to the balconies.

Sika concrete repair systems have an impressive track record which goes back more than 15 years and conform to the performance requirements of EN 1504: the European Standard for the protection and repair of reinforced concrete, demonstrating Sika's long term, technically correct construction solutions.

With the works now complete –Sika offered the perfect regeneration solution for the refurbishment and long term protection of this residential tower block.
