FLOORING: Sikafloor®-161 and Sikafloor®-264

BUILDING TRUST

RAF LOSSIEMOUTH SCOTLAND

SIKA SUPPLIES NEW BASE AT HOME OF THE DAMBUSTERS.

Sika has supplied a high performance, slip-resistant and fast-curing flooring solution for the refurbishment of Hangar 3 at RAF Lossiemouth in Scotland – home of the world-famous Squadron 617 formed in 1943 to carry out the Dambusters raid.

RAF Lossiemouth is set to become the sole base in Scotland for the RAF's Typhoon F2 Eurofighters following the closure of nearby RAF Leuchars in 2014. Appointed to refurbish the concrete floor of one of the site's hangars in preparation for the Typhoons' arrival, Anderson Specialist Contracting turned to the extensive product range and technical expertise of Sika.

For the 5,000m² main hangar floor, a coating was required that would deliver easy clean and anti-slip properties – whilst providing a fast and simple application. Developed to offer an outstanding surface finish and exceptional protection against heavy loading, abrasion and chemical exposure – SikaFloor proved ideal for the highly trafficked base.

Combining innovation in product development, the highest standards of manufacturing and Sika's unrivalled range of flooring systems meet and exceed client expectations, industry best practices and building regulations and legislation.

Now complete, the refurbished Hangar 3 once again provides an outstanding environment to house some of the RAF's most prestigious and valuable aircraft. With the help of a high performance floor system from Sika, the aircraft base benefits from a floor befitting of its historical heritage whilst offering long term performance for many more years to come.

Our most current General Sales Conditions shall apply.
