- Use gloves and other protective clothing when working with this material.
- It is the user's responsibility to ensure suitability for use.
- Do not walk on the reinforcement scrim whilst the

CHARACTERISTICS / ADVANTAGES

- Puncture resistant.
- Heavy duty fabric.
- Reinforcing component.
- Ease of installation.

seam sealer and detailer is wet.

- Allow a curing time of 24 - 72 hours for Hydrosil® once applied.

ECOLOGY, HEALTH AND SAFETY

This product is an article as defined in article 3 of regulation (EC) No 1907/2006 (REACH). It contains no substances which are intended to be released from the article under normal or reasonably foreseeable conditions of use. A safety data sheet following article 31 of the same regulation is not needed to bring the product to the market, to transport or to use it. For safe use follow the instructions given in the product

data sheet. Based on our current knowledge, this product does not contain SVHC (substances of very high concern) as listed in Annex XIV of the REACH regulation or on the candidate list published by the European Chemicals Agency in concentrations above 0,1 % (w/w).

APPLICATION INSTRUCTIONS

- Blisters/Splits: Large splits/blisters to use Hydrosil® heavy duty reinforcement roll fabric with Hydrosil seam sealer and detailer at 1.5 - 2 mm thick in a three-course fashion and spread to 5 cm to 10 cm beyond the splits/blister's areas.
- Membrane Repair: Thoroughly inspect the roof substrates for defects (holes and openings). For repairs over 3 mm wide, use Hydrosil heavy duty reinforcement roll fabric with Hydrosil® seam sealer and detailer, Seam Sealer at 1.5 cm thick in a three-course fashion and spread to 5 cm to 10 cm beyond the repaired areas.

LOCAL RESTRICTIONS

Please note that as a result of specific local regulations the performance of this product may vary from country to country. Please consult the local Product Data Sheet for the exact description of the application fields.

LEGAL NOTES

The information, and, in particular, the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika's recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product's suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request.
