

## **SARNAVERT – THE COMPREHENSIVE GREEN ROOFING SYSTEM THAT’S ALSO FULLY GUARANTEED**

Sika Sarnafil has re-launched its green roofing offering with a fully-branded system backed by a comprehensive guarantee.

Marrying its market-leading single ply membrane with a full range of green roof options, the Sarnavert system is already a popular choice among those searching for sustainable solutions.

But the offering is now fully branded, meaning all components of a green roof are protected by Sika Sarnafil’s market-leading guarantee (providing the appropriate maintenance programme is in place).

Sika Sarnafil national sales manager Rod Benson says this means that those specifying green roofs can be confident in the performance and longevity of *all* elements of a system, thanks to the new product and guarantee package.

“We’ve found that many green roofs on the market are inadequately protected,” he explains. “A common issue is that, while the waterproof base might be guaranteed by a manufacturer, end-customers usually have to shoulder the costs if the planting dies. That’s why we’re proud to have redressed this industry-wide problem by offering customers a complete product package that’s backed by our leading guarantee.”

Rod says that Sika Sarnafil has also worked closely with a number of specialist green roof installers to further strengthen the Sarnavert offering. “We now have registered green roof contractors who are experts in installing and maintaining the green element of the system, providing extra reassurance for our customers.”

By specifying a Sarnavert system, customers will also, of course, benefit from the proven performance and flexibility of Sika Sarnafil’s single ply membrane, which has an independently assessed BBA-certified life expectancy that states a life ‘in excess of 40 years’. The brand’s green roof membranes are approved by ‘FLL’ green roof guidelines standards, too. What’s more, projects receive full technical support from the Sika Sarnafil team, including an intermediate and final inspection to ensure the high quality workmanship of the registered contractors before the guarantee is issued.

ENDS

**NOTES TO EDITORS:**

Established in 1980 as an early pioneer in the use of single ply membranes in the UK roofing market, Sika Sarnafil is now the recognised market-leading brand in the supply of single ply systems for new and refurbishment projects for buildings of all sizes and functions. Offering a complete roofing solution, the Sika Sarnafil system is backed by comprehensive and tailored service options ranging from design and specification support, to installation through Sika Sarnafil-trained contractors and site inspections complete with industry-leading guarantees.

Sika Sarnafil is a wholly-owned subsidiary of the Sika Group, a global company based in Switzerland specialising in the manufacture and supply of chemical-based products for construction and industry. Celebrating its centenary in 2010, Sika is a recognised world-leader in its field and is committed to providing unrivalled innovation in product development, the highest standards of manufacturing, sustainable development and renowned technical advice and in-situ guidance. As a result, Sika has subsidiaries in more than 70 countries and generates annual sales of approximately CHF 4.556 billion.

Sika Limited, the UK subsidiary of the worldwide Sika Group, was established in 1927 and produces and markets a wide range of state-of-the-art systems. This includes the UK's two major single ply roofing brands – Sika Sarnafil and Sika-Trocal. However, the two brands – Sika Sarnafil, based in Norwich, and Sika-Trocal, in Welwyn Garden City – continue to operate separately.

Sika Sarnafil is based at Sika Limited, Bankside 300, Peachman Way, Broadland Business Park, Norwich NR7 0WF.
