SIKA AT WORK
Sika ComfortFloor® FOR ARCHITECTURE AND DESIGN BUSINESS INCUBATOR 27, PARIS

FLOORING: Sika ComfortFloor®
ARCHITECTURE AND DESIGN
BUSINESS INCUBATOR 27, PARIS

Flooring: Sika ComfortFloor®

PROJECT DESCRIPTION
The former headquarter of L’Etudiant magazine which has 3,800 m² floor area was gutted in 2010 and renovated in 2011 to house a new business incubator which is able to accommodate about 56 companies.

PROJECT REQUIREMENT
The developer wanted the building to be renovated to the state-of-art environmental standards, while, from a design point of view, taking particular care to maintain its architectural interior character. In addition, it had to meet European standards EN 13813 and EN 1504-2. The flooring also had to be supplied in a very short time frame.

SIKA SOLUTIONS
To meet all the requirements specified by the architect, Sika ComfortFloor® polyurethane resin flooring systems were chosen. These flexible flooring systems are the ideal solution for commercial and public building areas, offering the following advantages:

- Very low VOC emissions (compliant with French AFSSSET – 2009 protocol requirements)
- Attractive
- Sound dampening (feature of Sika ComfortFloor® Pro system)
- Excellent underfoot comfort
- Slip resistant

These systems also comply with the following standards:
NF EN 13813
NF EN 1504-2
European reaction to fire classification standard EN 13501-1

Each floor of the building is required to have a different flooring colour specified by the designer:
Ground floor: RAL 6018
1st floor: RAL 5015
2nd floor: RAL 1019
3rd floor: RAL 3003
Solarium: RAL 7042
